Конструирование из мозаики

Конструирование объёмных фигур

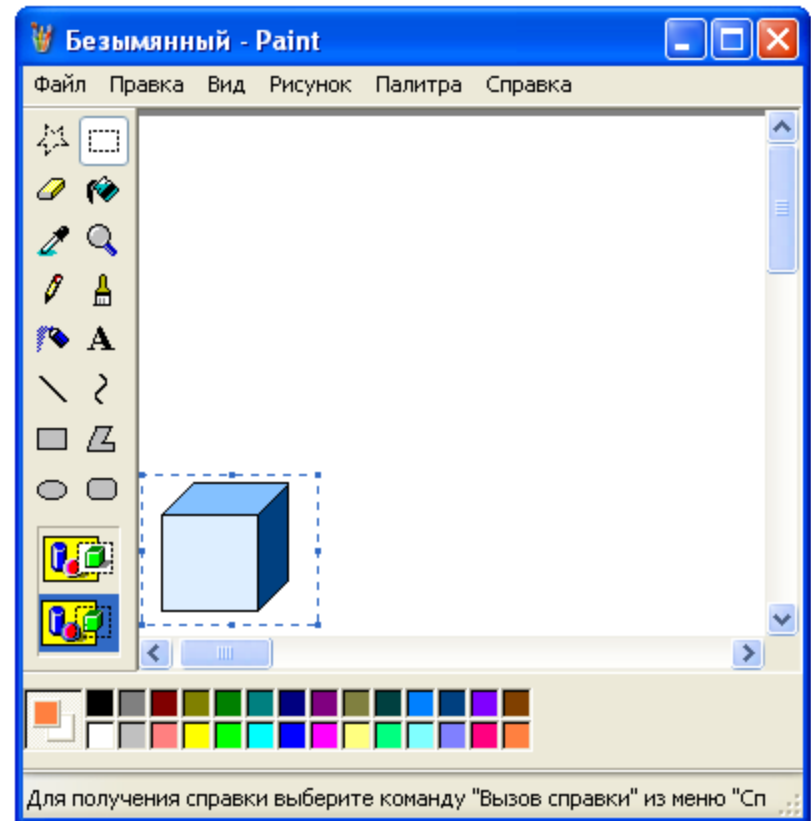

Используя объёмные фигуры, например кубики, можно получать интересные объёмные изображения.

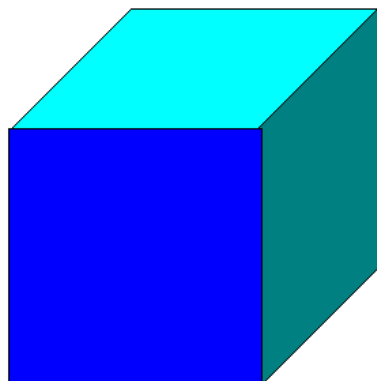

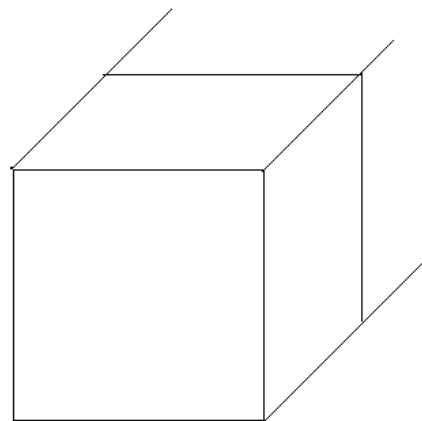

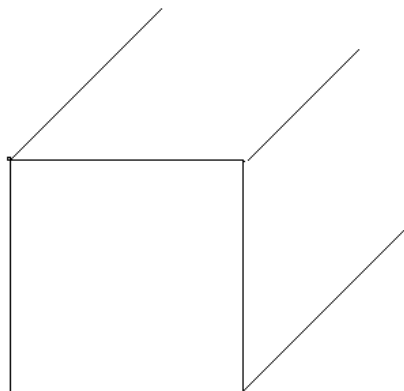

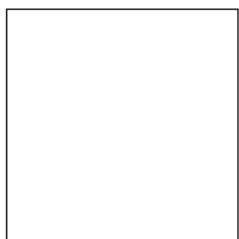

Для этого нужно сначала нарисовать один кубик в нижнем левом углу экрана, используя три разных оттенка одного цвета для раскраски граней.

Этот кубик всегда надо всегда копировать, он запасной.

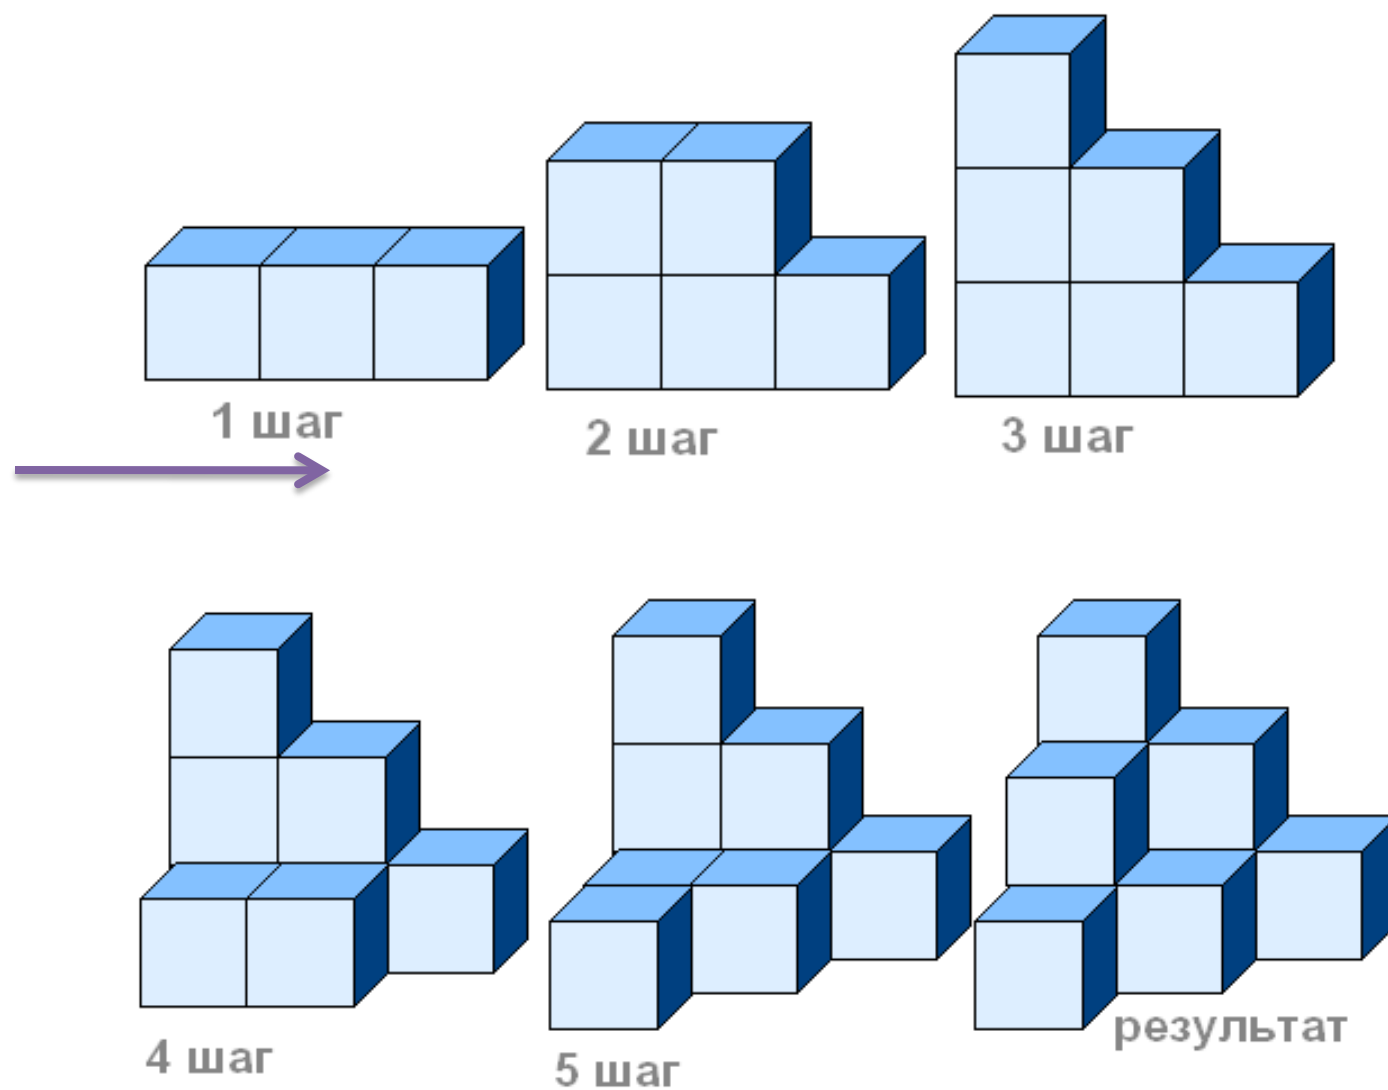

Складывать конструкцию нужно начинать всегда с **нижнего заднего ряда и слева направо.**

Иголки хрупкие
На ветке сотворились.
Драгоценность.

Жемчуг росинок
Светит на солнце с утра
Бабьего лета.

Холодит небо
Ментоловый леденец.
Луна в разгаре.

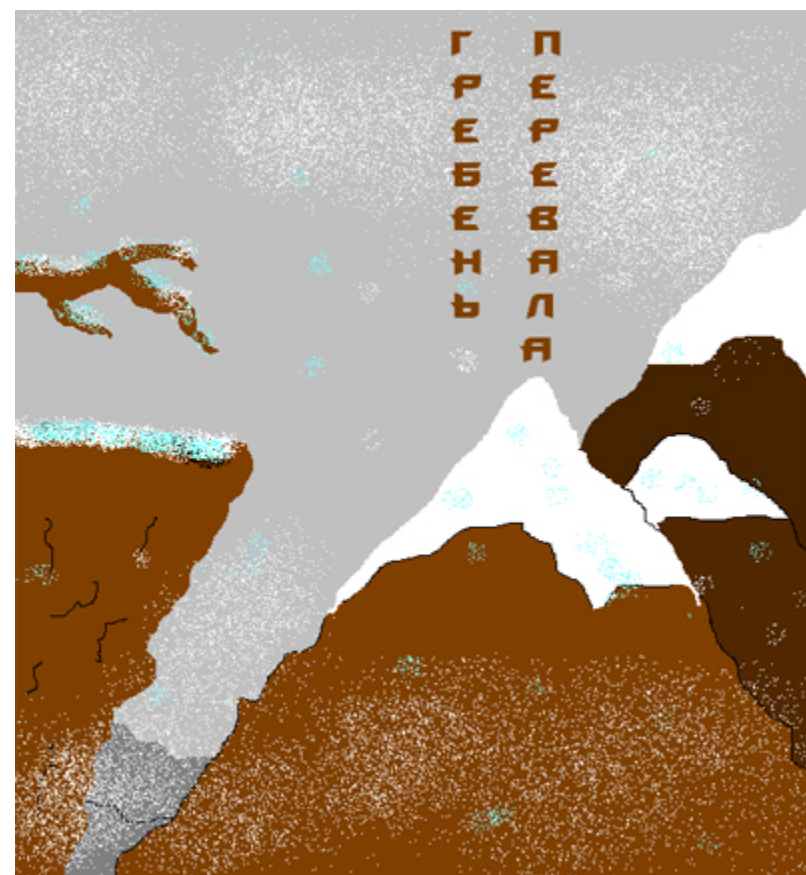

В черной паутине
Запуталась тень моя-
лунная ночь...

ОСЕННЯЯ ЛУНА СОСН
РИСУЕТ ТУШЬЮ НА
СИНИХ НЕБЕСАХ.
